

REVIT MEP

Course Overview

Autodesk® Revit® MEP training course has been designed to teach the concepts and principles of creating 3D parametric models of MEP system from engineering design through construction documentation.

The training course is intended to introduce students to the software's user interface and the basic HVAC, electrical, and piping/plumbing components that make the Autodesk Revit software a powerful and flexible engineering modeling tool. The training course will also familiarize students with the tools necessary to create, document, and print the parametric model. The examples and practices are designed to take the students through the basics of a full MEP project from linking in an architectural model to construction documents.

Course Attendees

This course is intended to those who wants to learn how to use Autodesk's REVIT MEP software particularly architectural and engineering professionals.

Course Pre-requisites

Background on Windows Application.

Course Grading

Pass / Fail
Candidate must pass the 35 multiple choice, matching, point and click computer based questions within a time limit of 120 minutes.

Course Duration

40 Hours

Course Units

- Introduction to BIM
- User Interface
- View Management
- MEP Systems
- Documentation and Annotation
- Project Setup
- Worksharing - Live
- Mechanical HVAC Modeling
- Mechanical Pipe Modeling
- Electrical Modeling
